

SiSiB® DF2170 Silicone Antifoam

INTRODUCTION

SiSiB® DF2170 is a high content silicone defoamer that can achieve the persistence required by traditional defoamers in small amounts. It is used in conventional surfactants, polymer foaming systems; as well as foam control agents and process aids for papermaking, pulping and washing.

PHYSICAL PROPERTIES

Appearance	Gray-white viscous liquid
Viscosity (25°C /cP)	30000-80000

BENEFITS

- Product component doesn't contain substance of SVHC substances
- Strong foam-suppressing performance

APPLICATIONS

SiSiB® DF2170 is a 100% active silicone antifoam compound used to control foam in vigorous foaming environments.

How to use:

Before SiSiB® DF2170 being added to the foaming medium, it must be prepared as a dispersion or emulsion. Aqueous emulsions can be prepared and preserved using commercially available emulsifiers and preservatives.

The optimal adding point, adding amount, adding method and dilution ratio shall be decided by the customer according to the actual situation on site.

PACKING

SiSiB® DF2170 is supplied in 200KG drum, and it can be customized according to the special needs.

HANDLING

This document does not contain the product safety information required for safe use. Before handling, please refer to the product and safety data sheets, as well as container labels, for information on safe usage, physical hazards, and health risks. Safety Data Sheet is available on the website, from the distributor, or by contacting SiSiB customer service.

STORAGE

When stored at temperatures between 10°C and 35°C in the original unopened containers, SiSiB® DF2170 has a shelf life of 12 months from the date of production.
