

# ADDSiL™ 5722 Silicone Defoamer

## INTRODUCTION

ADDSiL™ 5722 is a modified silicone defoamer. It is suitable for solvent-based systems.

## PHYSICAL PROPERTIES

Color and Appearance	Light yellow transparent solution
Ingredient:	Mixtures of modified polysiloxanes and non-silicone polymers
Active Component:	70%
Solvent:	Aliphatic hydrocarbon

## BENEFITS

- Excellent compatibility in oil coating;
- Outstanding defoam ability;
- Excellent foam breaking and foam inhibition ability

## APPLICATIONS

ADDSiL™ 5722 is suitable for solvent-based coating systems and has excellent foam breaking and foam inhibition capabilities.

ADDSiL™ 5722 is applicable to all stages of paint production and application methods, such as spraying, roller coating, brushing, etc.

## RECOMMENDED DOSAGE

The recommended dosage is 0.1-1.0% of the total formulations, which can be added at any stage of production.

The above recommended levels can be used for orientation. Optimal levels are determined through a series of laboratory tests.

## PACKING

ADDSiL™ 5722 is supplied in 25Kg Pail.

## HANDLING

This document does not contain the product safety information required for safe use. Before handling, please refer to the product and safety data sheets, as well as container labels, for information on safe usage, physical hazards, and health risks. Safety Data Sheet is available on the website, from the distributor, or by contacting SiSiB customer service.

## STORAGE

When stored at temperatures between 10°C and 35°C in the original unopened containers, ADDSiL™ 5722 has a shelf life of 24 months from the date of production.
