

ADDSiL™ 1361 Hammer Agent

INTRODUCTION

ADDSiL™ 1361 is a solution of high molecular organic modified polysiloxane. It can provide excellent hammer effect due to its high molecular weight.

PHYSICAL PROPERTIES

Appearance	Colorless transparent liquid
Ingredient	Modified silicone
Content (%)	10%
Solvent	solvent naphtha

BENEFITS

- Excellent low foaming stability;
- Good anti-adhesive and anti-crater;
- Excellent hammer effect;
- Good sliding and recoat ability.

APPLICATIONS

- ADDSiL™ 1361 could be used in solvent-based coatings, such as solvent-based aluminum powder paint, baking paint, air-dry alkyd paint, water-based system.

RECOMMENDED DOSAGE

ADDSiL™ 1361 could be added at any stage of production, according to different use systems and the amount added is different, generally with the dosage from 0.1% to 3.0%.

The above recommended levels can be used for orientation. Optimal levels are determined through a series of laboratory tests.

PACKING

ADDSiL™ 1361 is supplied in net weight 25kg metal pail.

HANDLING

This document does not contain the product safety information required for safe use. Before handling, please refer to the product and safety data sheets, as well as container labels, for information on safe usage, physical hazards, and health risks. Safety Data Sheet is available on the website, from the distributor, or by contacting SiSiB customer service.

STORAGE

When stored at temperatures between 10°C and 35°C in the original unopened containers, ADDSiL™ 1361 has a shelf life of 24 months from the date of production.
