

# KOBOND™ 8026 Dispersing Agent

## INTRODUCTION

KOBOND™ 8026 is a dispersant specially designed for putty. It has excellent wetting ability for inorganic pigments and can decrease the viscosity.

## BENEFITS / EFFECTS

- KOBOND™ 8026 is suitable for medium polarity systems which has good compatibility with various kinds of resins.
- KOBOND™ 8026 can reduce the grinding time and increase gloss and color strength.

## PHYSICAL PROPERTIES

Color and Appearance	Yellow transparent liquid
Ingredient	Polycarboxylic acid amine salt
Content	50%
Solvent	Mixed dibasic esters

## APPLICATIONS

- KOBOND™ 8026 is applied in solvent borne coating systems.

## RECOMMENDED DOSAGE

The recommended dosage as below:

Inorganic pigment	1~2%
Bentonite	5~20%

The above recommended levels can be used for orientation. Optimal levels are determined through a series of laboratory tests.

For optimum performance, the additive must be incorporated into the millbase before addition of pigments.

## PACKING

KOBOND™ 8026 is supplied in 25Kg Pail.

## HANDLING

This document does not contain the product safety information required for safe use. Before handling, please refer to the product and safety data sheets, as well as container labels, for information on safe usage, physical hazards, and health risks. Safety Data Sheet is available on the website, from the distributor, or by contacting SiSiB customer service.

## STORAGE

When stored at temperatures between 10°C and 35°C in the original unopened containers, KOBOND™ 8026 has a shelf life of 24 months from the date of production.
