

Version 7.1S

Page 1 / 13

Revision Date 06.04.2024

SECTION 1: Identification of the substance/mixture and of the company**Product Identifier**

Product Name: ADDSiL™ 16179

Relevant identified uses of the substance or mixture and uses advised against

Relevant applications identified For industrial use

Details of the supplier of the safety data sheet**Company**Nanjing SiSiB Silicones Co., Ltd.
Guanghua Sci & Tech Industrial Zone,
No. 104, Guanghua Road, Nanjing 210007, P.R.China
Email: SDS@SiSiB.com**Emergency Telephone Number:** +86-25-8468-0091**SECTION 2: Hazardous identification****Classification of the substance or mixture**

The product has not been classified as hazardous according to the legislation in force.

Classification (REGULATION (EC) No 1272/2008)

Not classified.

Label Elements**Labelling according to Regulation (EC) No 1272/2008:**

Not a hazardous substance or mixture according to Regulation (EC) No. 1272/2008.

Other hazards No data available.**SECTION 3: Composition/information on ingredients****Chemical nature** Polyether modified polysiloxane copolymer**Mixture****General information** No data available.

Chemical name	CAS No.	EC-No.	Concentration	Notes
Octamethylcyclotetrasiloxane	556-67-2	209-136-7	≥0.1-1.0≤	PBT, vPvB
Decamethylpentasiloxane	541-02-6	208-764-9	≥0.1-1.0≤	vPvB
Dodecamethylcyclohexasiloxane	540-97-6	208-762-8	≥0.1-1.0≤	vPvB

All concentrations are percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

This substance has workplace exposure limit(s).

Version 7.1S

Page 2 / 13

Revision Date 06.04.2024

PBT: persistent, bioaccumulative and toxic substance.

vPvB: very persistent and very bioaccumulative substance.

Classification

Chemical name	Classification	Notes
Octamethylcyclotetrasiloxane	Flam. Liq.: 3: H226; Repr.: 2: H361f; Aquatic Chronic: 2: H411;	No data available.
Decamethylpentasiloxane	No data available.	
Dodecamethylcyclohexasiloxane	No data available.	

CLP: Regulation No. 1272/2008.

SECTION 4: First aid measures**General advice**

If potential for exposure exists refer to Section 8 for specific personal protective equipment.

Description of first aid measures**If inhaled**

Move into fresh air and keep at rest. Get medical attention if symptoms occur.

In case of eye contact

Get medical attention if symptoms occur. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

In case of skin contact

Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water. Get medical attention if symptoms occur.

If swallowed

Do not induce vomiting. Get medical attention immediately. Do not give victim anything to drink if he is unconscious. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs.

Most important symptoms and effects, both acute and delayed

Unknown.

Indication of any immediate medical attention and special treatment needed**Hazards**

No information about adverse effects due to exposure.

Treatment

If swallowed, do not induce vomiting. Give a glass of water.

SECTION 5: Firefighting measures**General Fire Hazards**

Do not use water jet as an extinguisher, as this will spread the fire. Use water spray to keep fire-exposed containers cool.

Extinguishing media

Version 7.1S

Page 3 / 13

Revision Date 06.04.2024

Suitable extinguishing media

Alcohol resistant foam. Carbon dioxide Dry chemical.

Unsuitable extinguishing media

Avoid water in straight hose stream; will scatter and spread fire.

Special hazards arising from the substance or mixture

In case of fire, carbon monoxide and carbon dioxide may be formed.

Advice for firefighters**Special fire fighting procedures**

Take precautionary measures against static discharges. To prevent and minimize fire or explosion risk from static accumulation and discharge, effectively bond and/or ground product transfer system.

Special protective equipment for fire-fighters

Wear self-contained breathing apparatus and protective clothing.

SECTION 6: Accidental release measures**Personal precautions, protective equipment and emergency procedures**

Avoid contact with eyes, skin and clothing. Avoid contact with liquid and vapors. Use personal protective equipment. Use only in well-ventilated areas.

Environmental precautions

Do not allow runoff to sewer, waterway or ground.

Methods and materials for containment and clean up

Absorb spillage with suitable absorbent material. Shovel up and place in a container for salvage or disposal.

Reference to other sections

Remove sources of ignition. In case of spills, beware of slippery floors and surfaces. See Section 8 of the SDS for Personal Protective Equipment. Collect and dispose of spillage as indicated in section 13 of the SDS.

SECTION 7: Handling and storage**Precautions for safe handling**

Do not taste or swallow. Avoid contact with eyes, skin, and clothing. Wash hands after handling. Provide adequate ventilation. Avoid inhalation of dust and vapors.

Storage conditions

Keep container tightly closed. Keep away from sources of ignition - No smoking. Do not allow material to freeze.

Conditions for safe storage, including any incompatibilities

Keep container tightly closed. Keep away from sources of ignition - No smoking.

Storage Stability

Version 7.1S	Page 4 / 13	Revision Date 06.04.2024
--------------	-------------	--------------------------

Material is stable under normal conditions.

Specific end use(s)

No data available.

SECTION 8: Exposure Controls/Personal Protection

Control parameters

Occupational exposure limits

None of the components have assigned exposure limits.

Chemical name	Type	Exposure limit values	Source
propane-1,2-diol-Particulate.	TWA	10 mg/m ³	UK. EH40 Workplace Exposure Limits (WELs) (12 2011)
propane-1,2-diol – Total vapor and particulates.	TWA	150 ppm 474 mg/m ³	UK. EH40 Workplace Exposure Limits (WELs) (12 2011)

Biological Limit Values

None.

Exposure controls

Eyewash bottle with clean water.

Appropriate Engineering Controls

No special requirements under ordinary conditions of use and with adequate ventilation. Use only in well-ventilated areas.

Individual protection measures, such as personal protective equipment

General information

Use only in well-ventilated areas. Do not eat, drink or smoke when using the product. Wash hands after handling. Practice good housekeeping.

Eye/face protection

Safety glasses with side-shields conforming to EN166.

Skin protection Hand Protection

Advice: There is no risk to health due to contact with the chemical. Use hand protection to prevent mechanically injuries.

Other

Safety shoes Long sleeves.

Respiratory Protection

In case of insufficient ventilation, wear suitable respiratory equipment.

Hygiene measures

Observe good industrial hygiene practices. Wash hands after handling. When using do not eat, drink or smoke. Provide adequate ventilation.

Environmental exposure controls

No release to wastewater from process. The wastewater emissions limited to release generated from final equipment cleaning step using water.

SECTION 9: Physical and Chemical Properties

Version 7.1S

Page 5 / 13

Revision Date 06.04.2024

Information on basic physical and chemical properties**Appearance**

Physical state:	Liquid
Color:	Colorless/Yellow
Odor threshold:	No data available
pH:	5.0~7.0 (1% aqueous solution)
Freezing point:	No data available
Boiling point:	No data available
Flash point:	No data available
Evaporation rate:	No data available
Flammability (solid, gas):	No data available
Upper/lower flammability:	No data available
Explosive limits:	No data available
Vapor pressure:	No data available
Vapor density (air=1):	Heavier than air
Relative density:	No data available
Density:	1.00~1.05 g/cm ³ (25°C)
Solubility in water:	Soluble
Solubility (other):	No data available
Partition coefficient (n-octanol/water) Log Pow:	No data available
Auto-ignition temperature:	No data available
Decomposition temperature:	Material is stable under normal conditions.
SADT	No data available
Viscosity:	900~1400 mPa.s/25°C
Explosive properties:	No data available
Oxidizing properties:	No classified as oxidizing

SECTION 10: Stability And Reactivity

Reactivity	No data available.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	Hazardous polymerization does not occur.
Conditions to avoid	Unknown.
Incompatible materials	Inorganic halides. Strong oxidizing agents.
Hazardous decomposition products	Carbon oxides of silicon. Measurements at temperatures above 150°C in presence of air (oxygen) have shown that small amounts of formaldehyde are formed due to oxidative degradation.

SECTION 11: Toxicological Information**Information on likely routes of exposure****Inhalation** No data available.**Ingestion** No data available.**Skin Contact** No data available.**Eye contact** No data available.**Acute toxicity****Oral**Product LD 50 (Rat): > 2.000 mg/kg
OECD-Guideline 401 (Acute Oral Toxicity)**Specified substance(s)**

Octamethylcyclotetrasiloxane LD 50 (Rat): 4.800 mg/kg

Decamethylpentasiloxane LD 50 (Rat): > 60.000 mg/kg

Dodecamethylcyclohexasiloxane LD 50 (Rat): 2.000 mg/kg

DermalProduct LD 50 (Rat): > 2.000 mg/kg
OECD-Guideline 402 (Acute Dermal Toxicity) Not classified**Specified substance(s)**

Octamethylcyclotetrasiloxane LD 50 (Rat): > 2.400 mg/kg

Decamethylpentasiloxane LD 50 (Rabbit): > 15.000 mg/kg

Dodecamethylcyclohexasiloxane LD 50 (Rat): 2.000 mg/kg

Inhalation

Product Not classified for acute toxicity based on available data.

Specified substance(s)

Octamethylcyclotetrasiloxane LC50 (Rat, 4 h): 36 mg/l

Decamethylpentasiloxane No data available.

Dodecamethylcyclohexasiloxane No data available.

Repeated dose toxicity

Product No data available.

Specified substance(s)Octamethylcyclotetrasiloxane NOAEL
Rat (male and female), Inhalation – vapor (vapour): 150 mg/kg
Rabbit (male and female), Dermal: 950 mg/kg
Decamethylpentasiloxane No data available.
Dodecamethylcyclohexasiloxane NOAEL
Rat (male and female), Oral: 1.000 mg/kg**Skin corrosion/irritation**Product OECD-Guideline 404 (Acute Dermal Irritation/Corrosion)
Rabbit: No skin irritation

Version 7.1S	Page 7 / 13	Revision Date 06.04.2024
--------------	-------------	--------------------------

Specified substance(s)

Octamethylcyclotetrasiloxane	OECD-Guideline 404 (Acute Dermal Irritation/Corrosion) Rat: No skin irritation
Decamethylpentasiloxane	No data available.
Dodecamethylcyclohexasiloxane	OECD-Guideline 404 (Acute Dermal Irritation/Corrosion) Rabbit, 72 h: No skin irritation.

Serious Eye Damage/Eye

Product No eye irritation.

Specified substance(s)

Octamethylcyclotetrasiloxane	OECD-Guideline 405 (Acute Eye Irritation/Corrosion) Rabbit: Not irritating
Decamethylpentasiloxane	Rabbit: No eye irritation
Dodecamethylcyclohexasiloxane	OECD-Guideline 405 (Acute Eye Irritation/Corrosion) Rabbit, 72 h: No eye irritation, No irritating

Respiratory or Skin Sensitization

Product No data available.

Specified substance(s)

Octamethylcyclotetrasiloxane	OECD-Guideline 406 (Skin Sensitisation) Guinea Pig: Not sensitizing
Decamethylpentasiloxane	No data available.
Dodecamethylcyclohexasiloxane	Maximisation Test, OECD-Guideline 406 (Skin Sensitisation) Guinea Pig: negative,

Germ Cell Mutagenicity

In vitro

Product Ames-Test (OECD-Guideline 471)
Genetic Toxicology: Salmonella typhimurium,
Reverse Mutation Assay: negative (not mutagenic)

Specified substance(s)

Octamethylcyclotetrasiloxane	Ames-Test (OECD-Guideline 471) Genetic Toxicology: Salmonella typhimurium, Reverse Mutation Assay: negative (not mutagenic) Mouse Lymphoma Assay (OECD Guidline 476): negative (not mutagenic)
Decamethylpentasiloxane	No data available.
Dodecamethylcyclohexasiloxane	Ames-Test (OECD-Guideline 471) Genetic Toxicology: Salmonella typhimurium, Reverse Mutation Assay: negative

In vivo

Product No data available.

Specified substance(s)

Octamethylcyclotetrasiloxane No data available.

Decamethylpentasiloxane No data available.

Dodecamethylcyclohexasiloxane No data available.

Version 7.1S	Page 9 / 13	Revision Date 06.04.2024
--------------	-------------	--------------------------

Other effects

Octamethylcyclotetrasiloxane (D4) Ingestion: Rodents given large doses via oral gavage of Octamethylcyclotetrasiloxane (1600mg/kg/day, 14 days), developed increased liver weights relative to unexposed control animals due to hepatocellular hyperplasia (increased number of liver cells which appear normal) as well as hypertrophy (increased cell size). Inhalation: In inhalation studies, laboratory rodents exposed to Octamethylcyclotetrasiloxane (300 ppm five days/week, 90 days) developed increased liver weights in female animals relative to unexposed control animals. When the exposure was stopped, liver weights returned to normal. Microscopic examination of the liver cells did not show any evidence of pathology. This response in rats, which does not affect the animal's health, is well-documented and widely recognized. It is related to an increase of liver enzymes that metabolize and eliminate a material from the body. The increased liver weight reverses even while the D4 exposure continues. The finding is not adverse, but is considered a natural adaptive change in rats, and does not represent a hazard to humans. Inhalation studies utilizing laboratory rabbits and guinea pigs showed no effects on liver weights. Inhalation exposures typical of industrial usage (5-10 ppm) showed no toxic effects in rodents. Range finding reproductive studies were conducted (whole body inhalation, 70 days prior to mating, through mating, gestation and lactation), with D4. Rats were exposed to 70 and 700 ppm. In the 700 ppm group, there was a statistically significant reduction in mean litter size and in implantation sites. No D4 related clinical signs were observed in the pups and no exposure related pathological findings were found. A two-year, combined chronic/carcinogenicity study, during which rats were exposed to D4 by inhalation, data showed a statistically significant increase in a benign uterine tumor in female rats exposed at the highest level—a level much higher than the low levels that consumers or workers may encounter. An expert panel of independent scientists who have reviewed the results of this research concur that the finding seen in the two-year study occurred through a biological pathway that is specific to the rat and is not relevant to humans. Therefore, this observed effect does not indicate a potential health hazard to humans. In developmental toxicity studies, rats and rabbits were exposed to D4 at concentrations up to 700 ppm and 500 ppm, respectively. No teratogenic effects (birth defects) were observed in either study.

SECTION 12: Ecological Effects

Toxicity

Acute toxicity

Fish

Product No data available.

Specified substance(s)

Octamethylcyclotetrasiloxane No data available.

Results of PBT and vPvB assessment

Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB)

Octamethylcyclotetrasiloxane

Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB)

Octamethylcyclotetrasiloxane (D4) meets the current EU REACH Annex XIII criteria for PBT and vPvB and has been added to the candidate list for Substances of very high concern (SVHC). However, D4 does not behave similarly to known PBT/vPvB substances. The silicones industries interpretation of the available data is that the weight of scientific evidence from field studies shows that D4 is not biomagnifying in aquatic and terrestrial food webs. D4 in air will degrade by naturally occurring reactions in the atmosphere. Any D4 in air that does not degrade by these reactions is not expected to deposit from the air to water, to land, or to living organisms.

Decamethylpentasiloxane

vPvB: very Persistent and very Bioaccumulative substance

Decamethylcyclopentasiloxane (D5) meets the current EU REACH Annex XIII criteria for vPvB and has been added to the candidate list for Substances of very high concern (SVHC). However, D5 does not behave similarly to known PBT/vPvB substances. The silicones industries interpretation of the available data is that the weight of scientific evidence from field studies shows that D5 is not biomagnifying in aquatic and terrestrial food webs. D5 in air will degrade by naturally occurring reactions in the atmosphere. Any D5 in air that does not degrade by these reactions is not expected to deposit from the air to water, to land, or to living organisms.

Dodecamethylcyclohexasiloxane

vPvB: very Persistent and very Bioaccumulative substance

Dodecamethylcyclohexasiloxane (D6) meets the current EU REACH Annex XIII criteria for vPvB and has been added to the candidate list for Substances of very high concern (SVHC). However, D6 does not behave similarly to known PBT/vPvB substances. The silicones industries interpretation of the available data is that the weight of scientific evidence from field studies shows that D6 is not biomagnifying in

Version 7.1S	Page 12 / 13	Revision Date 06.04.2024
--------------	--------------	--------------------------

aquatic and terrestrial food webs. D6 in air will degrade by naturally occurring reactions in the atmosphere. Any D6 in air that does not degrade by these reactions is not expected to deposit from the air to water, to land, or to living organisms.

Other adverse effects No data available.

SECTION 13: Disposal considerations

Waste treatment methods

General information No data available.

Disposal methods Can be incinerated when in compliance with local regulations.

SECTION 14: Transport Information

ADR Not regulated.

AND Not regulated.

RID Not regulated.

IMDG Not regulated.

IATA Not regulated.

Special precautions for user

This product is not regarded as dangerous goods according to the national and international regulations on the transport of dangerous goods. Keep away from foodstuffs and animal feed.

Transport in bulk according to Annex II of MARPOL and the IBC Code

Not applicable.

SECTION 15: Regulatory Information

Safety, health and environmental regulations/legislation specific for the substance or mixture

EU Regulations

Regulation (EC) No. 2037/2000 Substances that deplete the ozone layer

None

Regulation (EC) No. 850/2004 on persistent organic pollutants
